HOW IT WORKS

Bloomea® is a safe 2-actions treatment that doesn't require downtime and can be performed weekly on the body and the face.

Depending on the client's needs, the more you progress in the sessions, the greater the efficiency is.

Over time, the new cells that regenerate give a tighter, younger-looking skin.

HYGIENE & SAFETY FIRST

Single-Use **Tips.**

A NEW TIP FOR EACH SESSION

Since the beginning of their research, the surgeons ruled out the use of “fixed tips” which were the cause of infections and skin rashes despite being disinfected after each session. **Bloomea® treatments have exclusively used personalized single-use tips to meet the strict hygiene requirements for this treatment.**

At the start of each session, a new tip is unsealed in the presence of the client and then attached to the handpiece.
